Solutions for sustainable economic development

20 YEARS

Celebrating its 20th anniversary, The GREEN Expo constitutes a business forum that provides solutions for sustainable economic development to national and regional industries.

In search of a "zero-impact" society and industry

THE GREEN EXPO 2012, is the country's largest business exhibition, bringing together leading companies that are developing unique products for industries seeking sustainable solutions.

Investment in technology, machinery and industrial processes to find solutions to minimize pollution and waste in the production process is already a reality in Mexico!

THE GREEN EXPO 2012, is the ideal place for networking with manufacturers, government agencies and the scientific and academic community.

During last year's Informe (the annual statement from the Mexican President), in Subsection 44 on Management and Justice in Environmental Issues, it stated that the management and implementation of environmental laws be effective, expeditious, transparent and encourage sustainable investment. This demonstrates Mexico's commitment to advancing environmental stewardship to improve competitiveness and economic growth.

The International Forum for the Environment sector in Mexico, which attracts national and international companies offering solutions to minimize pollution in the production process.

An exhibition featuring world-class companies offering solutions for energy generation from renewable sources and efficient energy use, as well as solutions for energy savings and efficiency.

Connect with other professionals seeking real solutions for a sustainable future.

Water Mex

A high-powered forum for companies that focus on:

- Sustainable water use and recycling
- Wastewater treatment in Industrial operations
- Watershed management and sanitation
- Monitoring Systems, transmission, distribution and water network management

Green CITY

A segment of the exhibition showcasing cutting-edge technology and information relevant to the development of green construction, energy conservation, transportation, air care, design, and the gradual implementation of best environmental practices and sustainable projects, green buildings, transportation, air monitoring and environmentally friendly urban development projects.

The GREEN Expo is:

- The most important international business event of its kind
- A forum with the country's most important international conference program
- A 3-day long gathering of government agencies, the scientific and academic community, and the production sectors
- The world's most comprehensive global technology event incorporating the environment, energy, water and sustainable cities sectors
- The venue for CONIECO's International Environment Congress
- A must-attend event featuring International Pavilions

*Business growth
and solutions for
sustainable
economic
development!*

If you are interested in doing business with industry buyers from Mexico, environmental experts and government representatives, you need to participate in The GREEN Expo.
