XXVIII International
Environmental
Congress

 CIRCULAR ECONOMY = SUSTAINABILITY,
EFFICIENCY, AND PROFITABILITY

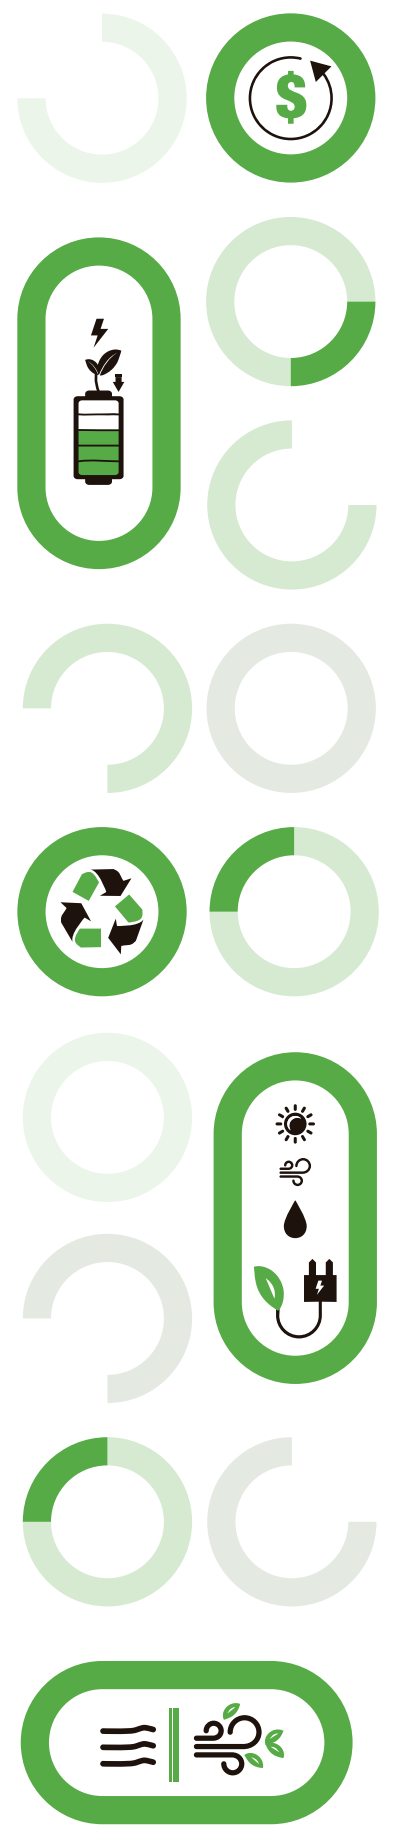

SEP | 8-10
2020
Centro Citibanamex, Mexico City

Organized by:

Venue:

NEW VENUE FOR 2020!

On its 28th Anniversary, THE GREEN EXPO®, will change location to Centro Citibanamex in order to bring you important benefits, such as:

- Improve the flow of attendee traffic by combining three unique events: Aquatech Mexico, Intersolar Mexico and THE GREEN EXPO® into one single exhibition floor.
- All activities will be located on the same exhibition floor: Inauguration, Conference Programs, Meals, Workshops, Stages and much more.
- The Centro Citibanamex offers the best service conditions in logistics, build-up, and dismantling.

This edition boasts the presence of leading companies from the industry exhibiting premier brands, products, services, and technologies related to environmental protection, natural resources, and sustainable development in the areas of waste management and recycling, solutions for the efficient use and the generation of energy from renewable sources, cutting-edge technology for urbanization and the development of green cities, among others.

THE GREEN EXPO® 2020 brings together a variety of organizations from the industrial, business, and government sectors that require technological solutions to make their processes more efficient and profitable. Such organizations are interested in avoiding a negative impact on the environmental and celebrate a common objective of generating jobs and growth for all industries interested in solutions within a circular economy.

We invite you to take the opportunity to join us as an exhibitor and present your company's newest technology, products, and solutions so you can access more industries to assist them in becoming more sustainable. The investments that are to be made during the next 10 to 20 years will have a profound effect on our global climate.

Increasingly more organizations and industries are striving to support this transition, seeking to invest in sustainable processes, technology, machinery, and solutions.

Climate change is one of the great challenges for humanity today. If we do not act immediately, there will be serious and irreversible consequences on the environment and on economic growth and development.

The objectives of the current government's National Development Plan, and its commitments for 2030, are to bring together all companies boasting the best and most innovative technological solutions. By doing so, this will allow us to achieve the country's objectives together.

Be one of the leading companies taking part in THE GREEN EXPO® 2020 and conduct business with decision makers who are looking for sustainable solutions for their companies.

Exhibit all your organization's solutions, technology, and products that can benefit other industries, and be a part of a Circular Economy. **+ Sustainable + Efficient + Profitable.**

- Contact more than **13,000** visitors
- Network with potential clients and partners
- Exhibit your products, technologies, and solutions
- Position and expand your brand.

ALL THIS UNDER ONE ROOF!

EXHIBITOR PROFILE

Our exhibitors provide sustainable solutions, products, and new technologies for the following fields:

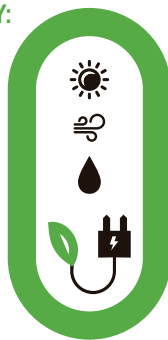

ENVIRONMENT:

- Air conditioning and heating
- Soil remediation
- Monitoring, analysis and measurement
- Urban Environmental Solutions
- Waste and Recycling
- Transportation
- Ecological Design and Construction

RENEWABLE AND CLEAN ENERGY:

- Energy saving
- Biofuels
- Biodiesel
- Biomass
- Cogeneration
- Geothermal energy
- Photovoltaic energy
- Energy efficiency
- Energy storage

GREEN CITIES:

- Sustainable construction
- Integral waste management

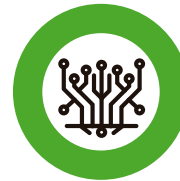

WATER:

- Clean Water
- Wastewater treatment
- Drainage treatment
- Sludge treatment

SERVICES:

- Consulting and Professional Services
- Education
- Media

THE SUSTAINABILITY WEEK
THE LATEST TRENDS FOR MORE AND MORE INDUSTRIES

XXVIII International Environmental Congress

The XXVIII CONIECO CONGRESS

The International Environmental Congress brings together Mexico's most influential community of national and international environmental experts to address the country's most pressing issues.

Three shows together!

International exhibition that presents innovative solutions and treatments for the water sector, integrating the most advanced clean water technologies.

International exhibition focused on photovoltaic, solar thermal energy technology, and energy storage.

RESULTS 2019
